

JAMES M. ECONOMIDES MD, FACS

IKON PLASTIC SURGERY AND MEDICAL AESTHETICS
BOARD-CERTIFIED PLASTIC SURGEON,
FOUNDER AND MEDICAL DIRECTOR

The Source For Deep Plane Facelifts

"I'm the source for advanced facial rejuvenation, and specifically natural-looking results from the deep plane facelift, the gold standard in surgical facial rejuvenation."

Dr. James M. Economides realized early in his training that aesthetic surgery done with the right intentions has a profound effect on how people move through the world. This laid the foundation for his work at Ikon Plastic Surgery and Medical Aesthetics.

"There's a humility required in this work: you are a steward of someone's trust, their appearance, and their confidence. I've never stopped feeling the weight of that."

Patients know they can come to Dr. Economides for direct relationship-patient care across every step of the way. "No handoffs, no filters, no variability. At Ikon, every decision is made by me and not delegated," said Dr. Economides. A kind of care that is rare to find in the DC region.

He recognizes that excellence in this industry is found in the patient who looks rested, refreshed, and like themselves ten years ago. It's shown in the results that go unnoticed because it looks completely natural.

"Surgeons are competing to do more, stack more procedures, add more volume, and the patients paying the price are the ones who stood out for the wrong reasons. The best outcomes are the ones no one can quite put a finger on," he explained.

Ikon's new advanced laser program will help patients achieve more natural results. Dr. Economides shared more, "It's centered on the Cartessa Helix, one of the most sophisticated energy-based platforms available." He continued, "We're offering CoolPeel, Fusion, and Sultra treatments which each address a different dimension of skin quality, texture, and rejuvenation."
